ElcomSoft Exposes Information Stored in BlackBerry Backups

Moscow, Russia – May 19, 2011 – ElcomSoft announces the release of Elcomsoft Blackberry Backup Explorer, a forensic tool offering full access to essential information stored in BlackBerry backups. The new tool provides forensic specialists and investigators with convenient access to the content of BlackBerry devices by extracting, displaying, printing or exporting BlackBerry data contained in a backup.

Access to password-protected backups is possible if the original password is known or recovered with Elcomsoft Phone Password Breaker. Elcomsoft Blackberry Backup Explorer is completely stand-alone, and does not require BlackBerry Desktop Software to operate. Advanced Professional and affordable Standard editions are available.

About Elcomsoft Blackberry Backup Explorer

With BlackBerries occupying approximately 40 per cent of the North American market of business communicators and about 20 per cent of the market worldwide, accessing information stored in BlackBerry devices can be essential for investigations, and is in high demand by forensic customers and government officials.

Elcomsoft Blackberry Backup Explorer provides forensic access to essential information stored in BlackBerry devices by extracting, analyzing, printing or exporting the content of an off-line backup in structured, human-readable form. Information stored in BlackBerry backups includes email and SMS, Web browsing history, call logs, pictures and photos, as well as organizer information such as phone books, contacts and appointments. Backups created with PC and Mac versions of BlackBerry Desktop Software are supported, while BlackBerry Desktop Software itself is not required to operate Elcomsoft Blackberry Backup Explorer.

Elcomsoft Blackberry Backup Explorer offers a variety of printing and exporting options in addition to on-screen analysis. PDF, HTML, DOC and RTF exports can include clickable Table of Contents for even easier navigation. PDF files produces with Elcomsoft Blackberry Backup Explorer can be protected with a password or access-restricted. A wide range of command-line options is available, enabling background batch operation and providing easy integration with existing forensic systems.

Password-protected backups are fully supported if the original, plain-text password is known. If there is no password available, the password can be recovered by using Elcomsoft Phone Password Breaker.

Pricing and Availability

Elcomsoft Blackberry Backup Explorer is immediately available. Professional ($199) and Standard ($49) editions are available. Local pricing may vary. BlackBerry Desktop Software is not required to operate Elcomsoft Blackberry Backup Explorer.
